

# Color Styles

Color styles have been chosen simply from colors that I enjoy and represent me. Purple is both fun but also a cool color and can be associated with a calming feel. I also originally made my portfolio from a repurposed website I had made previously where the color scheme was based around the main hero image on my portfolio for a cohesive brand.

# Typography Styles

Typography styles were chosen from SquareSpace as part of the offerings they allow in their sites. I chose Poppins for it to be more rounded, simple, with a bit of fun. Not too serious, but not silly either.
